

Industry Visit of Batch VII

Transpek Industries

Probably the largest beneficiaries of 'Make-in-India', the government's laudable initiative, are the students and young entrepreneurs. A little guidance would go a long way in developing them. Recognizing the significance of this, CKSVIM routinely organizes industrial visits for its M.B.A. students bringing about a much needed academia-industry connect.

On **13th January 2017** batch VII students visited **Transpek Industries**. "Transpek Industry Limited was set up in 1965 initially for manufacturing Transparent Acrylic Sheets. There lies the origin of the word **Transpek**. Since then the Company has grown to become one of the leading manufacturers and exporters of a range of chemicals servicing the requirements of customers from a diverse range of industries - Textiles, Pharmaceuticals, Agrochemicals, Polymers, etc. Since inception, Transpek has evolved as a **First Time Manufacturer** of several products in India and also pioneered the development of the market for the same"

The visit was beautifully arranged by the managers of Transpek and students learnt the nitty-gritties of a chemical manufacturing plant. Various forms of management, and how to use them was also demonstrated. A round-table conference followed the plant visit and students had a healthy discussion regarding the market dynamics.
